

Instructions to access surveys or reports in the Student Evaluation of Teaching (SET) on-line system

Each semester there will be an email sent with the link to add questions to the survey for faculty, access the survey to complete it if you are a student or access the reporting for faculty and supervisors.

The link is always on your Husky CT homepage. The survey is not within Husky CT. The link will direct you to the secure SET survey environment.

Students: To access any SET evaluation survey go to your Dashboard.

Go to>HuskyCT>sign-on with net ID and password> look in the bottom left corner of the homepage for the SET link and click to open.

It will open directly to your Dashboard.

You may access your current survey from the list of links by Course and Instructor. There may be more than one survey if the course was Team Taught.

Be certain to “Submit” your survey responses or they will not be counted.

Faculty: To access any SET evaluation result go to your Dashboard.

Go to>HuskyCT>sign-on with net ID and password> look in the bottom left corner of the homepage for the SET link and click to open.

It will open directly to your Dashboard.

Click on “Report” to access your current reports.

Once there are historical reports available, you may filter by semester/year to access the individual reports for previous semesters. There is a pdf version available for download.
